

# CS 440 Meeting Minutes

Group: 13

Date: 28 January 2021

Time: 8:00 PM

Duration: 1 Hour 30 Minutes

Present, on time: Tyler, Jasmine, Mansi

Present, not on time: N/A

Absent: Spencer

Synopsis:

The group went over what we did for the first HW assignment, starting with Jasmine, then Tyler, and finally Mansi, and described what each person was brainstorming for part one of the semester.

Recent Accomplishments:

- All present decided to go with Jasmine's project
- Tyler finished set up for jira
- Tyler sent email to missing group member
- Jasmine got clarification on the setup from TA's
- Mansi helped to clarify what was due and not

Current Activities: Decided on which project to do between us, going with Jasmine's idea on providing small businesses the ability to connect back with the community, building their online presence through a website. Will need to populate the sprints with appropriate items and begin general design decisions.

Action Items:

Mansi: Think of ideas for the UI, get familiar with React (or other website development tools), and work on the scenario due Monday.

Tyler: Research React.js (or other website creation tools), as this is not something he is comfortable with currently. It may be evil witchcraft, who knows really. Also, learn more about MongoDB and Node.js, or any other type of database/server services.

Spencer: N/A, not here to discuss roles

Jasmine: Come up with a layout of requirements and goals for this project.

All: Generate a basic UI design for the site and go from there. Nothing fancy, but something serviceable. At least 2 designs that we can work with.
