

CS 440 Meeting Minutes

Group: 13

Date: 13 March 2021

Time: 9:24 PM

Duration: 1 Hour 30 Minutes

Present, on time: Tyler, Jasmine

Present, not on time: N/A

Absent: Mansi

Synopsis:

Continued to add in and refine features for app functionality and established communication with the Firebase Database

Recent Accomplishments:

- Tyler implemented database communication for the emergency help function
- Jasmine researched how to add an API to the app and decided to try to implement it with the rest api method.
- Mansi continue to work on the tags and machine learning for photo identification

Current Activities: Implemented more of the UI design and functionality and implemented the second to last missing feature of the app.

Action Items:

Mansi: Will continue research and implementation on photo identification algorithms/APIs for photo/tagging function of the product.

Tyler: Get locational data from the user's device and transmit that to the database to complete the implementation of the emergency request system.

Jasmine: Continue to update UI and to get the API connected to grab a json object. However, I will attempt to grab it and not have fully implemented yet since there would be debugging going on.

All: Finish up Part 2 of the design document and begin preparations for the end of the second release
